

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## PREFACE.

---

THE *Second Volume* of the "Lists of Sanskrit Manuscripts in Private Libraries of Southern India" contains the names of 10,421 Manuscripts. To these is added an Appendix containing three Indexes.

The first is an "Alphabetical Index to the MSS. of Volume II;" the second an "Alphabetical Index of the MSS. in Volumes I and II according to Subject-matter," and the third an "Alphabetical Index of Authors with the names of their works mentioned in Volumes I and II."

These three Indexes refer to about 48,000 different items. Though I have tried to arrange them as carefully as possible, I know that the great number of references and insufficient information must have caused some inaccuracies to appear, especially in the two last parts of the Appendix. For such unavoidable deficiencies I appeal to the forbearance of the experienced critic.

The lists found in this volume have been obtained by me in the same manner as those in Volume I. In a few cases I have been supplied with catalogues by Government officials, the most important among these being that of the library of the Jāghirdār of Arnee forwarded to me by Mr. Whiteside when Collector of North Arcot.

Since I commenced printing this second volume, various districts of this Presidency have been visited by me, and, during my absence in 1883, by Mr. M. Seshagiri Sastriyar. Our search has been as yet mainly confined to the districts of Salem, North Arcot, Chingleput and the state of Mysore. In order to prove how rich Southern India is in Sanskrit Manuscripts, and how necessary it is that a search for such literary remains should be methodically conducted, I may point out that we succeeded in cataloguing in North Arcot and Salem about 3,500 and 8,300 MSS., while through the lists forwarded to me I was able to obtain the names of only 446 and 49 MSS. In Mysore alone, I have catalogued up to date 18,300 MSS. against 1,784 contained in these two volumes.

For the sake of information and comparison, I give in a table below the names of the districts and states, and the number of MSS. supplied by each.

| Name of District or State. | Number of<br>MSS. contained<br>in Volume I. | Number of<br>MSS. contained<br>in Volume II. | Total number<br>of MSS. |
